

Million Lion

2021-11-02

Intro

Generative NFT Avatar ML is the first project implemented by the ML team. Initially released on the Polygon blockchain on November 2, 2021. Each item from the collection acts as the access key to the projects developed by the Million Lion team.

Artwork

Images in the NFT collection represent the Million Token logo in form of a coin. They are generated off-chain, using a NFT generation engine developed by HashLips (art engine v1.1.0).

The collection is stored In IPFS, which is distributed peer-to-peer network for storing and sharing data. Initial state of the artwork is hidden and will be unveiled on 1 December, 2021. The functionality to show/hide the collection is built into the contract and will be used once to unveil the artwork.
